Building, Design, and Construction Solutions

Covering: NY, CT, RI, MA, NH, VT, ME, AZ, NM, CA, NV, UT, WY, ID, MT, WA, OR

BUILDING ENVELOPE:

DUPONT BUILDING SOLUTIONS
Rigid Insulation - ISO, XPS, Tapered

KNOTWOOD KNOTWOOD ALUMINUM WOOD

Fencing, Gates, Screens, Claddings Soffits, Battens, Awnings, Pergolas, Decking, Railings, Enclosures

BARRETT ROOFS AND WATERPROOFING

Hot & Cold
Fluid Applied Roofing and Waterproofing
Traffic Coatings
Garden Roofs

DURO-LAST ROOFING

Single-Ply PVC Roofing and Accessories
Metal Roofing and Panels
IMP

CONCRETE FORMING, EMBEDS, CHEMICALS AND ACCESSORIES:

OCTAFORM
Formwork, Quickliner, Containment Tanks, Column Armor, Temp Wall Divider Panel

RJD INDUSTRIES
Fiberglass Dowel, Fiberglass Rebar, Fiberglass form tie, splice seal

SUREBUILT CONCRETE FORMING AND ACCESSORIES
Form Ties, SurePly Forms, Shoring, Stud Rail, Staybox, Pipe Braces, Dowels, Area Wells, Tilt-up and Precast Hardware

INFRASTRUCTURE:

PRECASTEEL
Let's you set it and forget it.

MASTER BUILDERS
Concrete admixtures, waterproofing solutions, concrete repair and protection solutions, performance grouts and performance flooring solutions.

SUREBUILT CONCRETE FORMING AND ACCESSORIES
Bar Support, Bridge Deck, Coil Rod, Concrete Hoppers, Floor Dowels, Heavy Forming

CORROSION RESISTANT SYSTEMS

ERGON ARMOR

Additives and Raw Materials, Building Construction and Materials, Food-Beverage and Pharmaceutical, Industrial Maintenance, Infrastructure, Petrochemical, Power, Transportation, Commercial Roofing

Manufacturers of: THERMOCURE CONCRETE CYLINDER CURING BOXES

The original lightweight curing box with 35+ years of unquestioned performance.

Meets AASHTO T23 and ASTM C31 Curing Requirements. Holds 22 Standard 6"x12" Test Cylinders.

Uses water to heat and cool cylinders. Lightweight and easily transportable.

Be sure with THERMOCURE.

DuPont Building Solutions is a leader in delivering insulation, air sealing and weatherization technologies that help improve the energy efficiency and sustainability of residential and commercial buildings around the globe. For more than 60 years, Dow has leveraged the power of chemistry to create solutions that help building owners maximize energy efficiency, improve comfort and durability, and save money.

Duro-Last® Roofing Systems: Edge-to-Edge & Deck-to-Sky™. Known as the "World's Best Roof®", Duro-Last, Inc. is the world's largest manufacturer of custom-fabricated, thermoplastic single-ply roofing systems. Duro-Last is the only roof manufacturing company to offer prefabrication of the entire roofing system in our factory-controlled environment. Through our custom-fabricated commercial roofing systems – which can include both membrane and accessories – up to 85% of the seams are completed before it arrives on the job site. A custom-fabricated Duro-Last Roofing Commercial Roofing System is long-lasting, reliable and eliminates most of the on-site fabrication that can lead to roof leaks.

Barrett Roofs, For over 10 decades the Barrett Company has had hands-on experience, professionally engineered products, and stems in the high-performance roofing and waterproofing markets. Barrett's understanding and acquired knowledge of roofing basics and material engineering concepts, from asphalt polymerization to felt condensing techniques; from workable flashing techniques to CAD detailing, is applied to each and every project by a Registered Roof Consultant or a corporate principle.

KNOTWOOD offers all of these products in 38 Beautiful Woodgrains and 70 vibrant Solid Colors. These products have been cleverly designed to allow for a quick and easy installation with a 100% hidden fastening system. The versatility of KNOTWOOD's components and systems makes it possible to cap, cover and dress almost any project. KNOTWOOD makes it easy for architects, contractors, specifiers and homeowners to choose multiple architectural features with a 100% matching finish. Offered here is a one stop versatile and enduring solution.

Concrete: Forming, Embeds, Accessories & Chemicals

Designed as a novel alternative to conventional wall construction, Octaform's core product is FormWork, a PVC stay-in-place concrete wall forming system that reduces energy consumption and extends the life of high-performance concrete structures. The concrete wall is finished when formed – in one step. It saves time and eliminates the need for harsh coatings and cladding.

Concrete Coatings, Traffic Coatings, Waterproofing for Concrete Foundations.

Founded in 1987, RJD Industries is a manufacturer and distributor of specialized products for the concrete construction industry. Our product lines are designed to eliminate introduction of corrosion into concrete structures and provide additional cost savings by dramatically reducing the amount of manhours necessary to complete the job when compared to traditional methodologies.

SureBUILT provides premium products for commercial and government contractors, pre-casters and tilt-up engineers, rebar specialists and other constructions professionals. Our product lines consist of professional forming systems, products and accessories, scaffolding and shoring products, precast and tilt-up products, reinforcement, architectural formliners, egress window system and more.

SureBUILT Bridge Overhang Bracket

The Bridge Overhang Bracket adjusts to fit both structural steel and precast concrete beams. The size and shape of a bracket is adjusted by changing the vertical and diagonal legs to meet the specific overhang forming requirements. Bracket dimensions can be preset on the ground, then moved into position to speed forming operations.

Precasteel LLC, slip form for even more savings. Precasteel let's you set it and forget it. No horizontal reaction loads are transferred to the web of the structural members. No need for road closures or disturbance of wet lands to install since all work can be performed from topside and no removal necessary.

Master Builders Solutions represents more than 100 years of experience, innovation and expertise in the construction industry, providing advanced chemical solutions for new construction, maintenance, repair and renovation of structures. Since the early 1900's, the company has pushed the limits of chemistry and convention to develop and introduce products that improve construction in any application.

Corrosion Engineering, a division of ErgonArmor, manufactures a broad range of nonmetallic linings and materials to protect industrial infrastructure and equipment against corrosion. ErgonArmor, one of several Ergon, Inc. enterprises, is home to its Blackhawk, Novocoat, Ertech, and Corrosion Engineering divisions, which manufacture technologies for corrosion protection, moisture infiltration, adhesion, sound dampening, and surface treatment.
